PROFESSIONAL SUMMARY

Computer Science graduate with strong analytical and problem-solving abilities, hands-on experience in Java, Spring Boot, MySQL, and REST API development. Demonstrated capacity to learn quickly, collaborate across teams, and deliver practical technology solutions through academic and project-based work. Seeking to contribute technical expertise, adaptability, and a growth mindset through the Shell Graduate Programme 2026.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Loyola Academy Degree and PG College, Hyderabad

CGPA: **8.5 / 10.0**

Graduated: May 2026

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, Python

Frameworks: Spring Boot, REST APIs

Web Technologies: HTML5, CSS3, JavaScript

Databases: MySQL, SQL

Tools: Git, GitHub, VS Code

Core Concepts: OOP, Data Structures, Problem Solving, Agile Basics

PROJECTS

Smart Examination Monitoring System (SEM) | Role: Backend Developer | Java | Spring Boot | MySQL | REST APIs | JWT

- Engineered scalable backend services using Spring Boot to manage exams, users, and results with role-based access control, improving system security and data integrity
- Designed and optimized MySQL database schema, reducing query response time through structured indexing and efficient relational design
- Developed RESTful APIs for end-to-end exam workflows including creation, submission, and automated evaluation, enabling seamless frontend integration
- Implemented JWT-based authentication and authorization, enforcing secure user access and protecting sensitive examination data
- Built timer-based exam engine with auto-submit and real-time activity tracking, improving examination reliability and user experience

Secure Online E-Auction System using Blockchain | Role: Full-Stack Developer | HTML | CSS | JavaScript | Python | Solidity | Blockchain

- Developed a decentralized e-auction platform leveraging blockchain technology to enable secure, transparent, and tamper-proof bidding processes
- Engineered smart contracts in Solidity to automate bidding logic and eliminate fraudulent transactions, increasing trust and system integrity
- Implemented RESTful APIs with Python backend for CRUD operations and role-based access control, supporting scalable auction management
- Designed responsive frontend interfaces using HTML, CSS, and JavaScript, delivering real-time user interaction and improved engagement

CERTIFICATIONS

- Data Fundamentals** – IBM SkillsBuild (2025)
- Java Fundamentals** – Oracle Academy (2024)

- Artificial Intelligence Fundamentals** – IBM SkillsBuild (2024)
- Python Coding Training Program** – Mahindra Pride & Naandi Foundation (2025)
